Kitchen Cleaning & Food Safety

Cleaning is not the most popular job in the kitchen, but in times where **HACCP** sets the rules for high standards of hygiene, cleaning is one of the most important jobs to be done.

To help you comply with the HACCP rules, 3M™ offers a full range of **innovative products** for fast and efficient **cleaning of your kitchen equipment**: pots, pans, griddles, and sink tops. 3M products are soft enough to avoid scratching, yet tough enough to quickly and easily remove burnt-on and dried-on food. 3M products will help you remove grease or any kitchen grime from any corner.

Discover our Scotch-Brite™ products to **scour, clean and wipe** all kind of surfaces in your kitchen and choose the right tool for each cleaning job.

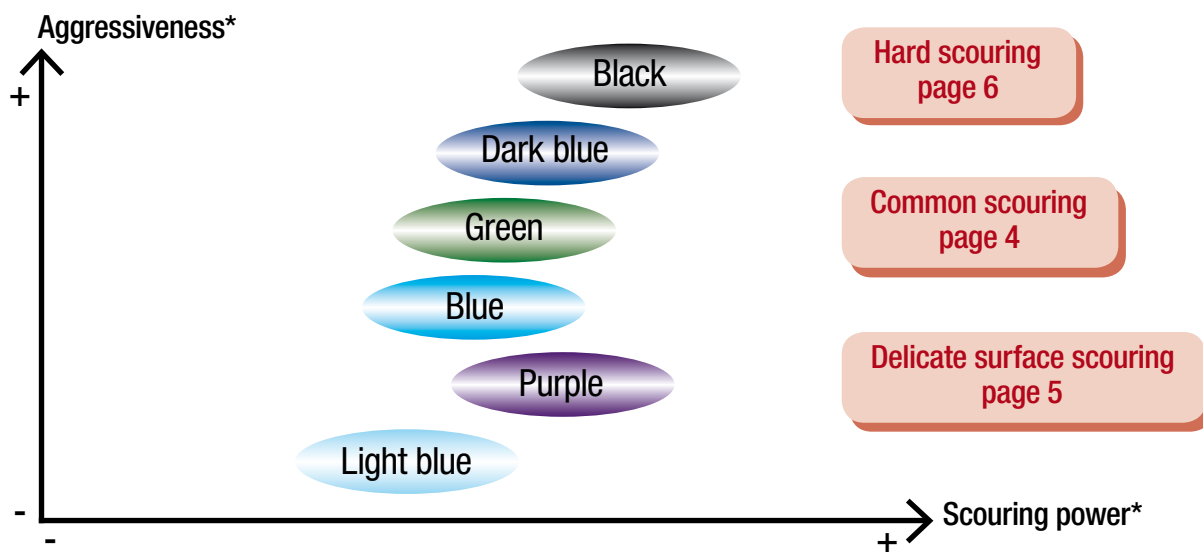

Food safety is a key point nowadays in the kitchen. 3M brings you solutions to help you comply with local health regulations, to meet HACCP requirements. Thus, 3M **oil monitoring** solutions allow you to control the quality of your frying oil and reject it just in time.

Why not taking advantage of the brilliant ideas and products which 3M supplies? They give you the freedom to concentrate on the culinary aspects of your catering business, **transforming thus eating into dining**.

Kitchen Cleaning - Scouring

There is always a Scotch-Brite™ solution designed for any scouring application

*Each colour refers to the colour of the product and depends on the aggressiveness of the web.

Kitchen Cleaning - Scouring

The classical Green: for general purpose scouring

All green webs are not created equal!

3M production cycle insures abrasive particle are dispersed throughout the pad in an even way thus giving you an excellent scouring power during the life of the pad. The Scotch-Brite™ pads will not only last long but also keep their effectiveness over time.

Constant quality checks make sure you have the best quality product in hand.

Our web does not rust or splinter and therefore does not leave residues!

Green

Scotch-Brite 96 pad

Daily cleaning of most cooking utensils and equipment.

- Long lasting thanks to the abrasive particles spread throughout the pad

3M PCT 120 Oil Tester

Fast oil quality testing after frying operations

- Measurement of polar compounds amount thanks to the colour mark on strips
- Can be used with any kind of oil
- Help you discard your oil just in time to comply with local health regulations and HACCP requirements
- Avoid wasting money by overconsumption

Type	Description
Kit	1 device + 1 tube of 5 strips + 1 spoon
Strips	1 x 20 strips

3M Low Range Shortening Monitor (LRSM) Test Strip

Immediate oil quality testing after frying operations

- Fast measurement of Free Fatty Acids amount thanks to the colour mark on strips
- Ideal process for restaurants having always the same oil and fried food, one test needed per fryer
- Help you discard your oil just in time to comply with local health regulations and HACCP requirements
- Avoid wasting money by oil overconsumption

Type	Description
Strips	4 x 50 strips
Strips	10 x 20 strips

How to choose between LRSM and PCT 120?

The choice will depend on regulations in your country: you can measure either Free Fatty Acids or Polar Compounds:

The **LRSM** will give you a **Free Fatty Acids** measurement while **PCT 120** will provide the **Polar Compounds** measurement.

Kitchen Cleaning - Floor and Surface Cleaning

Manual cleaning solutions for shiny floors in the kitchen

3M™ Easy Scrub System

Wet flat mopping system ideal to clean all floor surfaces

- Easy to use: pushing a button on the top of the handle releases the cleaning solution
- Easy to handle: light weight, ergonomic and non-bulky system
- Can be used with any cleaning solution for daily maintenance

Type	Size
Easy scrub Handle	137 cm
Easy scrub Holder	98 x 406 mm
Mops	127 x 457 mm

Doodlebug™ Cleaning System

Cleaning of corners, skirting boards and hard-to-reach areas

- Complementary tool for cleaning, scrubbing or stripping operations on horizontal or vertical surfaces
- Different pad colours depending on different the toughness needed and surfaces

Type	Reference	Size
Pad Holder	6474	95 x 225 mm
Pads	5 available aggressiveness	117 x 254 mm

& Building Protection & Maintenance

Cleanliness is an essential point in welcoming your guests as much as *hygiene and security in your building*. Furthermore, managing your facilities effectively includes maintaining a safe and efficient working environment for your work colleagues and your customers. That is why 3M develops innovative products and solutions for designing, building and protecting your facilities.

We know how you like to work. When you specify materials you want total performance with no comeback. Thanks to 3M *technical expertise* in building maintenance over the years, our *designs* are built to last.

3M ability to use and combine different technologies in innovative ways provides you reliable, *good looking* and performing solutions for your building. We aim to protect and enhance your building, your living environment, while reducing maintenance cost and improving safety.

With 3M, get the best for a safe and clean building.

Building Protection & Maintenance - Windows protection

3M Window Films protect customers, people, buildings and assets

All around expertise from 3M

When it comes to window films, 3M offers an unrivalled level of experience. As the only manufacturer to produce our own raw materials, you can rely on our constantly high level of quality.

We give you all the technical advice you need from on-site consultation to glass stress analysis and payback period energy analysis, to offer a complete, 360-degree approach.

3M™ security films for people and property protection against accidental and deliberate breakage

- Almost unpenetrable protective shield on the glass windows and doors
- Great reduction of damages to buildings and furniture through flying pieces of glass as the film holds the shattering glass in place
- Virtually clear window appearance

3M sun control films make you more comfortable and increase the value of your property

- Avoid the need for darkening blocking systems such as blinds or shutter that stop the natural light, impair the view and can increase the cost of internal lighting
- Contribute to glare reduction
- Contribute to UV reduction: Ultra Violet light is largely responsible for the fading of colours and degradation of materials
- Increase the value and the design of your property: more than 30 different shades and quality for exterior as well as interior applications

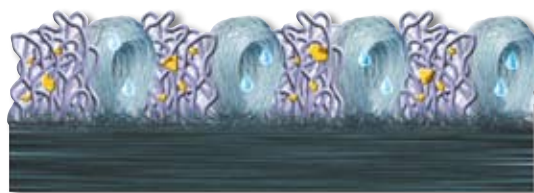

3M Ultra Prestige : A combination of sun control and security films

- Benefit from a more comfortable environment with increased security
- Effective protection against glare
- Very high heat reduction
- Strong glass retention capabilities while allowing the glass to appear virtually clear

Building Protection & Maintenance - Floor protection

Nomad™ matting: a unique dual-fiber loop pile construction to allow dirt and water to fall through the loops. Thanks to this structure, Nomad keeps its pledge of durability, efficiency and excellent visual effect.

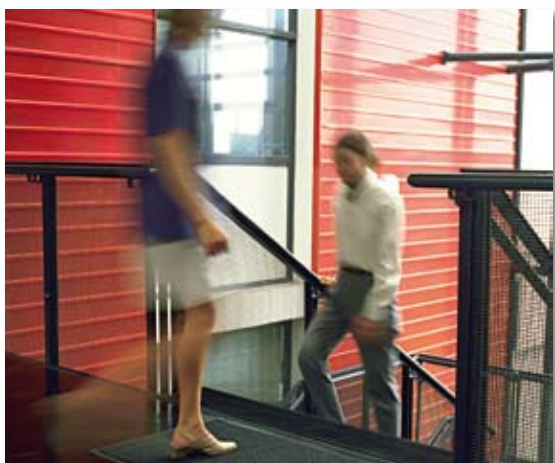

Nomad Aqua 8500 Matting

Drop-down inside matting for entrance with high traffic

- Hides and keeps dirt and water inside the structure
- Prevents flooring getting slippery

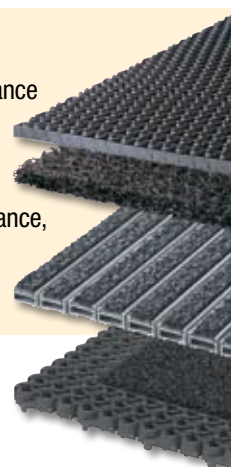

Type	Reference	Size
Textile Mat	8500	Different sizes and colours available

Nomad Matting

Nomad matting is now the widest entrance matting range you can think of.

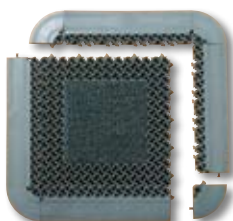

This allows you to choose exactly the right product combination for your entrance, your climate your traffic situation and even your design requirements.

Nomad Modular Matting

For entrance with high traffic: PVC tiles or mix version PVC and textile

- Triangle top surface to remove, trap and hide soil
- Mix version PVC and textile allows moisture absorption
- Modularity to create your own design
- Easy to install: excellent flexibility
- Solid construction to resist trolley traffic
- Can be installed without recessed well thanks to the hedging kit

Type	Reference	Size
PVC tiles	8300	30 x 30 cm per tile
PVC and textile tiles	8900	30 x 30 cm per tile

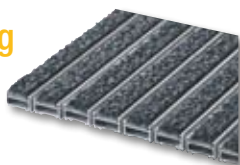

Building Protection & Maintenance - Floor protection

Nomad™ Optima Matting

For recessed well entrance
with extreme traffic

- Rubber strips provides impact resistance and noise reduction
- Extremely resistant
- Space between profiles allows soil to fall through
- Available cut to size

Type	Reference	Size
Aluminium profile Mat	9900	Different sizes and colours available

Nomad Terra 8100

For recessed well or outside
entrance with high traffic

- Durable coiled web structure removes, traps and hides high amount of soil
- Flexible coils brush shoe soles
- Easy to clean

Type	Reference	Size
